

P #16

Ch 12 - pg 384

 ΔU for a cycle:

$$\Delta T = 0 \text{ so } \Delta U = 0$$

 $W =$ -area under graph:

$$W = -\frac{1}{2}(4 \text{ m}^3)(6000 \text{ Pa})$$

$$W = -12,000 \text{ J}$$

$$\Delta U = Q + W \quad \text{so} \quad 0 = Q + (-12,000 \text{ J})$$

$$Q = 12,000 \text{ J}$$

b) W for the reverse process is positive: $W = +12,000 \text{ J}$

$$\text{so } \Delta U = Q + W$$

$$0 = Q + (12,000 \text{ J})$$

$$Q = -12,000 \text{ J}$$
