

P #12

Ch 4 - pg 107

a)

$F_1 = 400 \text{ N}$
 $F_2 = 450 \text{ N}$

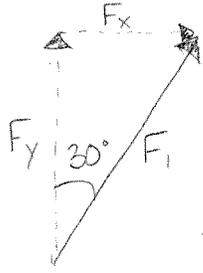

$F_{\text{net}} = ?$

For F_2 :

For F_1 :

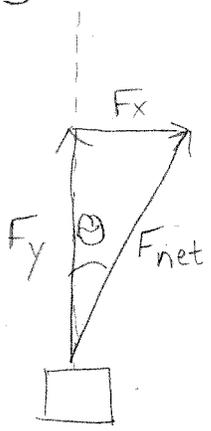

$F_{y1} = F \cdot \cos \theta$
 $= (400 \text{ N}) \cdot \cos 30$
 $F_{y1} = 346 \text{ N}$

$F_{x1} = F \cdot \sin \theta$
 $= (400 \text{ N}) \cdot \sin 30$
 $F_{x1} = 200 \text{ N}$

$F_{y2} = F \cdot \cos \theta$
 $= (450 \text{ N}) \cdot \cos 10$
 $F_{y2} = 443 \text{ N}$

$F_{x2} = F \cdot \sin \theta$
 $= (450 \text{ N}) \cdot \sin 10$
 $F_{x2} = -78 \text{ N}$

For F_{net} :

$F_x = F_{x1} + F_{x2}$
 $= 200 \text{ N} + -78 \text{ N}$
 $F_x = 122 \text{ N}$

$F_y = F_{y1} + F_{y2}$
 $= 346 \text{ N} + 443 \text{ N}$
 $F_y = 789 \text{ N}$

$F_{\text{net}}^2 = F_x^2 + F_y^2$
 $= (122 \text{ N})^2 + (789 \text{ N})^2$

$F_{\text{net}} = 798 \text{ N}$

$\tan \theta = \frac{F_x}{F_y}$ so $\theta = \tan^{-1} \left(\frac{F_x}{F_y} \right)$

$\theta = \tan^{-1} \left(\frac{122 \text{ N}}{789 \text{ N}} \right)$

$\theta = 8.8^\circ$ to the right of forward

b) $F_{\text{net}} = 798 \text{ N}$
 $m = 3000 \text{ kg}$
 $a = ?$

$F_{\text{net}} = m \cdot a$

$(798 \text{ N}) = (3000 \text{ kg}) \cdot a$

$a = .266 \text{ m/s}^2$
